Kizyma Electric and National
Broadcasting Company (NBC)

500 kVA UPS Replacement at
NBC Office in Los Angeles, CA

Major UPS Equipment
Upgrade With No Down-Time

Summer 2017 - Global Power Supply (GPS) was commissioned by Kizyma Electric for a 500 kVA UPS upgrade at a Los Angeles National Broadcasting Company (NBC) studio.

Kizyma Electric is a Los Angeles based commercial Electrical Contractor offering innovative solutions for growing companies. Kizyma Electric is especially active in the hospital, technology, and aerospace fields.

Described as among the the finest commercial electrical contractors in Southern California, some of the additional applications Kizyma Electric specializes in are: OSHPD work, design/build, tenant improvement, data centers, construction, laboratories, and emergency power.

GLOBAL POWER SUPPLY

UPS Upgrade Commissioned by Kizyma Electric for NBC Studios

UPS Replacement and Asset Recovery

For a project at a Los Angeles based National Broadcasting Company (NBC) office, Kizyma Electric commissioned Global Power Supply to replace a 500 kVA UPS system with the requirement that there be no down time or power outage while the work was being performed.

Global Power Supply (GPS) was specifically chosen for the project because of its experience executing these types of sensitive electrical equipment upgrades with no down time. And also because GPS owns and maintains a fleet of mobile UPS systems that are self contained in an enclosed trailer, with cooling systems, UPS, battery cabinets and controls all aboard, and they're available for rent nationwide.

GPS' mobile UPS systems have the advantage of being able to set up outside a building, so no inside space is required when upgrading or swapping out equipment.

For this specific project, GPS deployed their 500 kVA UPS trailer, a 500 kW generator and associated cables, a load bank tester, and an Automatic Transfer Switch (ATS).

The permits for the project were handled by Kizyma Electric and NBC, and when ready, GPS quickly mobilized the equipment, set up, and began the work.

"GPS successfully coordinated all aspects of this project with care and precision."
