

California utility providers SCE and PG&E are considering Public Safety Power Shutoff (PSPS) events in California as part of the wildfire mitigation plan with the California Public Utilities Commission (CPUC) announcing under dangerous conditions the high voltage power lines will be de-energized in high fire-threat areas. Critical power facilities need to evaluate their utility service coverage immediately and assess their ability to withstand the potential loss of grid power, and the need for a backup generator power system.

- **Rentals & Custom Solutions**
- **Site Surveys**
- **Design & Engineering**
- **Provide ATS & Conduit Wiring**
- **On-Site Construction**
- **Delivery, Offload, Install**
- **Fueling & Startup**
- **Preventative Maintenance**
- **Remote Monitoring**
- **Financing**

Global Power Supply develops customized turnkey solutions. We define the scope, timetable and costs. Our project management team manages all phases of the project, staying abreast of critical milestones; electrical contractors, sizing of generators, local permitting, site plan and photography, landlord approvals, startups, remote monitoring and preventative maintenance.

- ◆ **New & Used Power Systems**
- ◆ **Nationwide Service**
- ◆ **Immediate Deployment**
- ◆ **Turnkey Installations**

Generating Solutions for Critical Infrastructure Facilities
