

**Best in Reliability. Best in Value.  
Best in Service.**

Mesa's line of natural gas and propane powered generators are U.S. made and EPA-certified, developed from the engine block up to be reliable, durable, and efficient. Built upon a proven marine-grade block, the engines have replaceable dry liners, water-cooled exhaust and hardened valve seats. Superior engine performance is driven by an engine control unit integrating and coordinating all critical functions.

- Over 99% Historical Runtime
- US EPA-Certified
- Natural Gas and Liquid Propane Powered Engines
- Automatic Fuel Switching For Continuous Performance
- Paralleling Capability Allows For Multiple Megawatt Power Generation
- Sound Attenuated Enclosures Exceed OSHA Standards
- On-Board Telemetry System For Remote Monitoring
- Pipeline Gas or Field Gas from 750-2500 BTU
- Temperature Controlled Units For Cold Weather
- On-Board Scrubber
- Monthly Rental Program Includes Delivery, Service, 24/7 Support and Maintenance

Available Models	Prime kW Ratings
8L Normally	70 kW NG / 70 kW LP
Aspirated 8L Turbo	125 kW NG / 85 kW LP
11L Turbo	170 kW NG / 110 kW LP
14L Turbo	225 kW NG / 225 kW LP
22L Turbo	350 kW NG / 310 kW LP

## Major Fuel Savings: Natural Gas vs. Diesel Generator Fuel Cost Analysis
