

La MARCHÉ

ISO 9001:2015 CERTIFIED

IUPS

INDUSTRIAL UPS SYSTEM 5 kVA up to 60 kVA

The La Marche Industrial Uninterrupted Power System (IUPS) is designed based on pulse width modulation (SPWM) rectifier and inverter using fully digital DSP+ IGBT technology. This transformer-based double-conversion IUPS is highly robust, well-proven and provides the highest level of flexibility. This transformer-based IUPS incorporates the latest designs and operates at high efficiency while providing galvanic isolation. The 12-pulse rectifier section generates very low total harmonic current distortion (THD) under 5% improving input power factor. The low AC ripple currents in DC voltage along with a battery test feature improves battery life and availability. The IUPS is designed with an output transformer, allowing flexibility where bypass voltage and rectifier input voltage can be from a separate source.

The built-in Static Switch using power SCRs provide instantaneous transfers (less than 4ms) to an alternate source if any disturbance occurs at the UPS input. The highly reliable IUPS is the preferred choice in mission-critical applications and high-power data centers compared to transformer-free UPS technology.

The La Marche IUPS is equipped with a dynamic real-time Touch-Screen mimic panel displaying power flow, voltages and currents, alarms and status, data logging, and user-friendly password protected configuration capabilities.

The IUPS is highly customizable; kVA rating, Input/Output Voltages, Charger Sizing, enclosure protection ratings, distribution, isolation bypass transformer, distribution, and many more.

Shown Above:
IUPS-15KVA, IUPS-40KVA and IUPS-60KVA

Standard Features

- IGBT - SPWM Technology
- Input and Output Isolation Transformer
- Hybrid Design of 12 Pulse Rectification & IGBT Regulation
- 7" Touch Display
- Mimic Panel and Keyboard
- Battery Test
- Web Based Monitoring (Ethernet Port)
- Alarm Dry Contacts
- Data Logging
- Static Bypass Switch
- Battery Temperature Compensation (adjustable rate)
- Real Time Clock
- Input, Battery, Bypass and Inverter Output Circuit Breakers
- IP20 Rated Enclosure
- UL 1778

Optional Features

- Input Harmonic Filter (THD < 10%)
- External Manual Bypass Switch
- External Bypass Isolation Transformer
- Emergency Power OFF (EPO)
- Additional IP Rated Enclosures

Communication Protocols

- 21J** IEC 61850 Ethernet
- 21P** DNP 3.0 Communications RS232/RS485/Ethernet
- 21Q** Modbus Communications RS232/RS485/Ethernet
- 21S** Modbus RTU RS232/RS485
- 21X** SNMP and Web Browser (Ethernet)

Specifications subject to change without notice

Specifications

UPS INPUT	UPS kVA Rating	(Up to 60) kVA
	AC Input Voltage	3 Phase: 380Vac, 400Vac, 415Vac & 480Vac 1 Phase: 120Vac, 208Vac, 220Vac, 230Vac & 240Vac
	AC Input Range	-12% / +10%
	Input Frequency	50Hz or 60Hz ($\pm 5\%$)
UPS OUTPUT	AC Output Voltage	1 Phase: 120Vac, 208Vac, 220Vac, 230Vac & 240Vac Split Phase: 120/240Vac (2Ph, 3W)
	Output Voltage Regulation	$\pm 1\%$
	Output Frequency	60Hz $\pm 0.1\%$ (50Hz Available)
	Frequency Stability	Free Running $\pm 0.1\%$ Mains sync $\pm 3\%$
	Total Harmonic Distortion	Linear load: $< 5\%$ Non-linear load: $\leq 7\%$ (non linear load defined by IEC 62040)
	Efficiency	AC-AC = 82% DC-AC = 89%
	Inverter Overload Capacity	105% for 60mins 125% for 10mins 150% for 1 min >150% for 200mS
	Load Power Factor	0.8 lagging to 0.8 leading
	Output Crest Factor Admissible	3:1
DC LINK	DC Voltage	125Vdc 250Vdc
	DC Voltage Range	(96-150)Vdc (192-300)Vdc
	Inverter DC Input Voltage Range	-20% / 18%
	Rectifier Output Voltage Line/Load Regulation	$< 1\%$
	Rectifier Output Voltage Ripple	$< 2\%$
	Battery Charger Capacity	110% of system capacity (higher capacity charger available on request)
STATIC SWITCH	kVA Rating	125% of System Rating
	Transfer Time	$< 4\text{mS}$
	Overload Capacity	125% for Continuous 150% for 10 minutes 200% for 1 minutes 1000% for 1 cycle
MANUAL BYPASS	Switch Type	Rotary Switch (3 Positions - UPS, Test and Bypass)
	Switching	Make Before Break
PROTECTION	Protection	Input Under Voltage, Input Over Voltage, Output Under Voltage, Output Over Voltage, Battery Over Charging, Input in Rush Current Protection by soft start as well as pre-charge circuit, Output Over Load, Battery Under Voltage, DC Over Voltage, Output Short Circuit
ENVIRONMENTAL	Ambient Temperature	0° to 40°C (32° to 104°F)
	Relative Humidity	0-95% non-condensing
	Operating Altitude	Up to 1000 meters without derating the output
	Noise Level	65-70 dBA @ 1 meter
MECHANICAL	Enclosure Color	RAL 7035 or as Requested
	Cooling	Fan Assisted (Temperature Dependent)
	External Protection	IP20 as standard (others available upon request)
	Dimensions	According to ratings and options
	Compliance	UL 1778 NEMA PE1 IEC 62040 -1 / -2 / -3 FCC Part 15 Class A
