Titan 130 Onshore Gas Turbine
The Titan 130 Onshore gas turbine generator set is completely integrated, fully operational and equipped with the accessories and auxiliary systems required for operation. Designed specifically for industrial service, Titan 130 Onshore generator sets are compact, lightweight units requiring minimal floor space for installation. Proven packaging designs greatly reduce installation costs, time, materials, and labor.

- New in 2013, (2) units available, located in California
- Gas turbine generator set consists of an axial-flow gas turbine engine, generator, and reduction-drive gearbox
- Includes start and fuel systems, lubricating oil system
- Turbotronic 4 Control System
- Onskid Electrical Wiring
- Skid with Drip Pans
- Ancillary Air Inlet and Exhaust Systems
- Package Enclosure with Ventilation System, Fire Detection and Suppression System, Combustible Gas Detection System
- Voltage 12470/60Hz
- Out of manufacture warranty can be purchased directly from Solar Turbines
