Toshiba 4400 Series - The Next-Generation Three-Phase UPS

The 4400 3 Phase Uninterruptible Power Supply (UPS) utilizes double-conversion, all insulated-gate bipolar transistors (IGBT) technology and is available in power ranges from 15 to 100 kVA. The 4400 Series UPS systems are ideal for data centers and easy to install and customize for multiple markets and applications.

All units include the following features as standard equipment:

- True On-Line, Double-Conversion, All-IGBT Technology
- Intelligent low harmonic pulse-width modulation (PWM) output
- State-of-the-art electronic battery isolation circuitry
- Easy to navigate local touchscreen interface
- Small footprint and total front access mechanical design requires zero rear clearance and includes features such as top, bottom, and/or side cable entry
- Standard sized air filter provisions
- Lockable keyed doors
- 0.9 Power Factor

UPS Monitoring

RemotEye® 4 offers real-time control, monitoring, and analysis of UPS operation. The quick and easy-to-use software can automatically initiate an orderly shutdown to connected servers to minimize any risk of data loss. RemotEye® 4 also features a first-ever mobile website for monitoring UPS status updates on-the-go. Universal communications protocols compatible with RemotEye® 4 include Modbus TCP & RTU, BACnet IP & MSTP, HTTP/HTTPS, and SNMP. Compatibility with IPv6 also is included.
