What You Can Expect from GPS

Our business practices:

- ◆ Our team is honest and will always conduct business with integrity and straightforward communications.
- ◆ Our goal is long term partnerships driven by customer focused recommendations.
- ◆ We will be environmentally conscious and comply with all laws.
- ◆ We know our limitations and will not perform work beyond our capabilities.
- ◆ GPS will carefully maintain customer confidentiality.

A Single Call for All Your Project Needs

- ◆ Multi-vendor equipment supply and services.
- ◆ Honest and straightforward project recommendations.
- ◆ Delivering options so you can achieve project priorities.
- ◆ Trade-in and deployment processes to optimize your budget and project success.

A row of large white industrial containers, likely for data storage, is parked on a gravel lot. The containers are arranged in a line, receding into the distance. In the background, there are mountains under a clear sky. A yellow forklift is visible on the right side of the lot. The containers have black bases and some have small blue labels.

Multi-Vendor Solutions

Equipment, Solutions, Service & Rapid Delivery

Global Power Supply is an industry leader in power solutions and engineered systems. We specialize in the sales of diesel and natural generators, HVAC and UPS equipment.

- ◆ Natural Gas Generators
- ◆ Diesel Generators
- ◆ UPS
- ◆ Computer Room Cooling
- ◆ Custom Enclosures
- ◆ Switchgear
- ◆ Automatic Transfer Switches
- ◆ Transformers

Certified Pre-owned Generators

We stock over \$20 million in industrial and commercial diesel and natural gas generators.

Maybe you are rightsizing, downsizing or need to trade-in an industrial generator. GPS's nationwide service offers decommissioning services with turnkey support.

- ✦ **Multi-Point Inspection**
- ✦ **Load Testing**
- ✦ **Available for Rapid Delivery**
- ✦ **Fast Track Projects**
- ✦ **Preventative Maintenance Services**
- ✦ **Quality Guaranteed**
- ✦ **Extended Warranties Available**

Turnkey Decommissioning

- ◆ Asset Buy Backs
- ◆ Equipment Trade-Ins
- ◆ Upgrades
- ◆ Consignments
- ◆ Cash Offers
- ◆ Customized Solutions
- ◆ Transportation, Storage, Deliveries

The primary goal of Global's asset recovery program is to deliver additional value to the client and create new budget dollars that can help fund new projects or reduce capital requirement for existing programs.

Acquisition of PEI UPS Systems

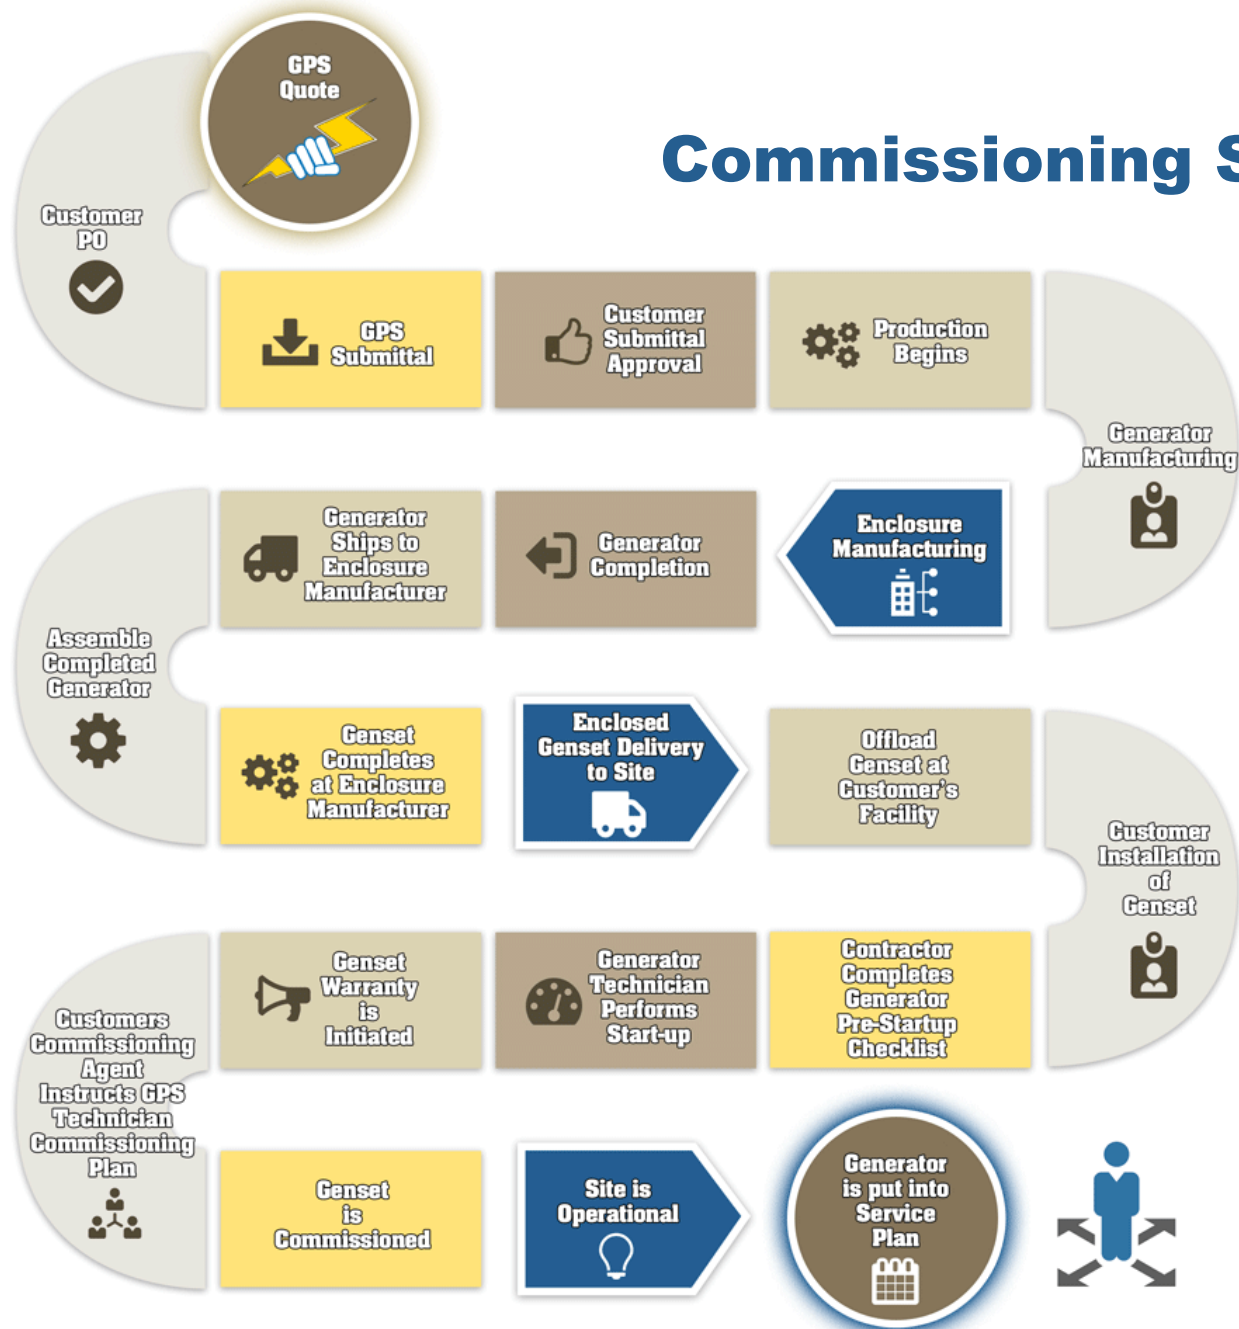

Global Power Supply provides emergency power outage resolution solutions. Whether it is planned or during a project, GPS provides reliable and efficient mobile rental UPS power solutions in all shapes and sizes.

- ◆ Units from 80 kVA – 1000 kVA
- ◆ Configurable 500 kVA N+1
- ◆ Single Units to Turnkey Packages
- ◆ Pre-integrated Systems
- ◆ Start-Up and 24/7 Support
- ◆ Rental and Sales

We operate nationwide and provide local technicians to promptly deliver our UPS solutions to ensure continued, reliable service.

Rob Hansen
Global Power Supply
5383 Hollister Ave.
Santa Barbara, Ca 93111

April 2, 2008

Dear Rob,

I wanted to take a moment to thank you for the terrific work you’ve done to assist my Project Management Staff across the country to solve the equipment specification and sourcing challenges we encounter.

As you know, our corporate clients do not always have the luxury or discipline to adequately plan for the supplementary power equipment, and other ancillary equipment that they come to need in their facilities. As you know, unforeseen technical and equipment requirements can introduce significant and costly delays into a construction project. Your ability to quickly review and understand the technical requirements of their needs, and to put together recommendations for equipment has been invaluable in allowing our Project Managers to bring solutions to our clients and keep projects moving. In addition to the decisive technical analysis, your ability to leverage Global Power Supply’s inventory of equipment and network of manufacturers has brought relief to our clients on projects with both Schedule and Budget worries.

Please don’t hesitate to contact me if there’s any thing I can do to help your organization, or if there are any professional references I can provide on your behalf.

Sincerely,

Joseph Burns
Senior Project Manager

What Our Customers Say

Global Power Supply has been a valuable member of our data center deployment team, their expertise in standby power applications as well as their competent and responsive project management approach has allowed us to meet our project goals.”

- Jay Park, Director of Data Center Design and Construction at Facebook

Facebook Partners with Global Power Supply to Ensure Millions Around the World Stay Connected

Santa Barbara, California- May 6, 2011-Global Power Supply, provider of critical power equipment and fully integrated power services for emergency back-up and primary power applications, was recently chosen by Facebook to meet the critical power needs of their new data center in Prineville, Oregon. Facebook began the construction of this new data center with the goal of creating a more energy efficient computing infrastructure at a relatively low cost.

Facebook Datacenter, Prineville OR

“Inspired by the model of open source software, we want to share the innovations in our data center for the entire industry to improve upon.” -Tom Furlong, Director of Operations at Facebook

Facebook's new data centers were designed and engineered to be some of the most energy efficient and economically sound systems available. In order to accomplish this, Facebook's engineering team required a custom designed power system and back up generators that could handle the unique demands of their massive server loads. Global Power Supply was able to deliver, accommodate and support these requirements by providing a diverse range of products as well as a highly customized array of services and support.

“Global Power Supply has a unique vendor neutral approach that allows us to provide highly customized critical power solutions.” -Ron Zamir, CEO at Global Power Supply

Critical Power Infrastructure is vital for the uninterrupted operation of Facebook's constantly expanding network. “Having energy efficient software and servers means we can support more people on Facebook and offer them new and real time social experiences.” - Tom Furlong, Director of Operations at Facebook. Global Power Supply provides their clients with unique project management services to implement and oversee all aspects of their project through completion. “Global Power Supply takes a ‘Value Engineering’ approach to the design and implementation of their custom generator power systems in order to minimize costs and maximize reliability.” - Ron Zamir, CEO at Global Power Supply
