

## TRADE-IN PROGRAMS

- Asset Buy Backs
- Equipment Trade-Ins
- Upgrades
- Consignments
- Cash Offers
- Customized Solutions
- Transportation, Storage, Deliveries

The primary goal of these asset recovery programs is to deliver additional value to the client and create new budget dollars that can help fund new projects or reduce capital requirement for existing programs.

Over 20% of the backup power projects in the United States result in the removal of existing generators and power systems. This excess equipment may have a high trade in value.

GPS receives daily supply requests for used generators from our worldwide database of nearly 20,000 contacts. Our access to these requests combined with our certified pre-owned generator testing and inspection process allows us to pay a fair market value for your excess and surplus equipment.

- Diesel Generators
- Natural Gas Generators
- Rental Mobile Generators
- Custom Enclosures
- Fuel Tanks
- ATS

- Light Towers
- Transformers
- UPS
- Load Banks
- HVAC & Air Handlers

Every project is different and has a unique set of priorities. In some applications you need fast delivery, while other projects are a bit more budget sensitive, and still others require detailed program management to oversee the project to a successful installation.

Global Power Supply understands the challenges of managing these changing priorities and can provide you with custom solutions from a single service provider. Thus allowing you to quickly and efficiently make the choices that best address your project's priorities.

A single call to the Global Power Supply team will provide equipment and support options that can address your needs for project specific priorities such as budget constraints, delivery requirements, technical performance, and field service options.

## Global Power Supply offers you the best options in selling your used equipment
